VITAL EDUCATIONAL STATISTICS
SEPTEMBER 29, 1978
VOLUME I

Note:

This is a report of public school data collected through the State Department of Education's Annual Fall Survey and is published in accordance with the requirements of N.J.S.A. 18A:4-40 and Chapter 212 Laws of 1975. The report is divided into sections that will emulate the basic district, school, student and facilities educational data sub-systems through which the Department plans to collect, process and retrieve all future data. It is designed to provide the hundreds of users who request information from the Office of Management Information with a data source that may meet their needs.

William J. Mathis, Ph.D.
Deputy Assistant Commissioner
Operations, Research and Evaluation

Chancellor of Higher Education

INTRODUCTION

The 1978-79 edition of Vital Educational Statistics is the fifth in a series which began in 1974-75. It is also the second year of a new series that used data derived from re-designed instruments supported by detailed and illustrated instructions, and, a glossary of standard terms and definitions. It is also the first year of a division of the publication into two volumes. This Volume, (I) contains school district and school data, enrollments, dropouts, graduates and facilities data. Volume II will be devoted to certificated and non-certificated staff information.

This publication includes several tables that appear for the first time in the series: A table on enrollments in the Educational Improvement Centers, (E.I.C.'s) and a table on student suspensions and expulsions. The table on suspensions and expulsions reflects data for the 1977-78 school year.

Each of the three sections (school districts and schools; students, and facilities) contains a statement outlining the various State and Federal requirements mandating the data collections; and, statements detailing the manner in which the data are to be used.

The Office of Management Information wants to acknowledge the efforts of the District Data Analysts who supplied the data and who submitted an evaluation of the instruments and instructions used in the survey.

We also want to acknowledge the efforts of the County Data Analysts listed on the following page. Their efforts in organizing workshops and coordinating the distribution, collection and edit of the Survey instruments is largely responsible for the credibility of the information contained in this publication. Office of Management Information staff who were responsible for editing the instruments and the tables contained in this publication were supervised by Terri Bolla and Elaine Ailey.

Alex Aderer was responsible for the development and machine edit of the many computer runs required to produce the school, district, county and State level reports generated in support of this publication.

SECTION I

DISTRICT AND SCHOOL INFORMATION

DISTRICT AND SCHOOL INFORMATION

Section I, contains the following tables: Table I, Operating and Non-Operating Public School Districts; Table II, Enrollment Size of New Jersey Public School Districts; and Table III New Jersey Public Schools by Type of School.

Table I shows an increase in the number of districts from 610 to 613 in 1978-79. The increase was due to the formation of Educational Services Commissions two of which became operational and one remained non-operational. The growth in the number of districts reflects efforts to organize the delivery of educational services to meet the changing needs of target populations. Throughout this publication, data will be reported for only those 593 districts that were operational in 1978-79.

Table II is a tabular presentation of school district size in the most densely populated State in the nation. Three hundred and fifteen (315) districts have enrollments greater than 1,000 students. That number (315) is six (6) less than in 1977-78. Thirteen (13) districts have enrollments greater than 12,000 students. That is one (1) less than in 1977-78. Two hundred and seventy-eight (278) districts, (46 percent) have enrollments less than 1,000 students.

Table III is a summary of schools by school type. Column (12) shows a total of 2,443 public schools, a net decrease of 18 from the previous year. Of the total number of public schools (1978-79) 1,997 were elementary and 446 were secondary schools. Increases in school type (over 1977-78) were in the middle school category (an increase of 13), an increase of three (3) secondary schools for the handicapped and two (2) classified as "other". Decreases were primarily in the elementary school category and four (4) four-year high schools.

Counties reporting increases in the number of schools were: Atlantic, Cape May, Gloucester, and Warren. Six (6) counties reported no change in the number of schools. Each of the remaining counties (10) reported one or more fewer schools.

SECTION II

STUDENT INFORMATION

STUDENT INFORMATION

This section contains 1978-79 data related to student enrollments, dropouts, suspensions, expulsions, and high school graduate follow-up information. The 15 tables included in this section reflect data reported as of September 29, 1978. Tables have been added to show student enrollments in the Educational Improvement Centers (E.I.C.'s) and, students suspended and expelled.

ENROLLMENTS

Table IV is a membership table i.e., pupils on roll during the last school day of September (1978). The data are reported for day school students and were compiled from individual school reports submitted by each district. The special education pupils (Col. 16) are students on roll in self-contained classrooms. The "mainstreamed" special education students have been reported with the regular students in their respective grade levels. There were 1,337,327 students on roll as of September 29, 1978.

All of the counties experienced some enrollment decline with the exception of Ocean County where a small increase was reported. During the five-year period, (1973-74 to 1978-79), 127 districts experienced an enrollment increase. The most substantial increases were reported by districts in the Counties of Atlantic, Burlington, Cape May, Cumberland, Essex, Gloucester, Hudson, Hunterdon, Mercer, Middlesex, Monmouth, Morris, Ocean, Passaic, Salem, Somerset, and Sussex.

When compared to last year, enrollment declines occurred in all grades with the exception of grades 3, 4, 12, and,special education students enrolled in self-contained classrooms. Enrollment projections indicate that the decline will continue into the next decade.

Table V consolidates enrollments in the various counties into regions coterminous with the Educational Improvement Centers (E.I.C.'s). The table shows that enrollments range from a high of 455,346 in the Northeast Region to 221,483 in the Southern Region. The Central Region serves 395,207 students and the Northwest Region serves 265,291 students at the elementary and secondary levels.

Table VI is the first of two tables separating students on roll into elementary and secondary school tables. On September 29, 1978 there were 827,978 elementary students on roll. This was 33,833 fewer students than reported during the fall of 1977. The elementary enrollment decline began approximately ten years ago (1968-69) in Union County, followed by Somerset and Middlesex in 1969-70, and Bergen, Essex and Passaic in 1970-71. By 1978-79 all counties reflected elementary school enrollment declines from peaks reached during the decade of the seventies.

Table VII shows that as of September 29, 1978 there were 509,349 secondary school students on roll in grades seven through 12. This was 10,368 fewer students than the number reported during the fall of 1977. According to the records of the Office of Management Information the decline in secondary enrollments began in 1971-72 in Union, Bergen, Essex and Cumberland Counties. However, the secondary school enrollment decline has not been experienced in all of the counties. Ocean County's secondary enrollments have continued to increase throughout the decade of the seventies. Secondary school enrollment increases (over last year (1977-78) were reported for Cape May, Cumberland, Hunterdon, Ocean, Sussex and Warren Counties.

Table VIII is the first of two (2) enrollment tables reflecting data by sex and "Minority" classifications. The data are by county with State totals. Additional detail on racial/ethnic data by school district, is available through Racial/Ethnic Enrollments and Dropouts 1978/79, a publication of the New Jersey Department of Education.

"Minority" is a composite of the racial/ethnic groups contained in Table IX, Columns four (4) to 11. Those groups are: Black, Hispanic, American Indian/Alaskan Native; and, Asian or Pacific Islander.

Of the total number of public school students enrolled, 25.9 percent were reported as Minority. This is an increase of .9 percent over last year when 25 percent were reported as Minority enrollments. Eight (8) counties exceeded the State average of 25.9 percent Minority: Hudson, 58.9 percent; Essex, 58.3 percent; Passaic, 39.4 percent; Cumberland, 37.0 percent; Union, 34.1 percent; and Camden 27.2 percent.

School districts that did not report Minority enrollments were located in Atlantic, Burlington, Camden, Cape May, Gloucester, Hunterdon, Middlesex, Monmouth, Ocean, Somerset, Sussex, Union and Warren.

Male student enrollments continued to exceed female enrollment by 2.4 percent.

Table IX data are reported by district in a publication titled, "New Jersey Public School Racial/Ethnic Information 1978/79." In this publication and table (Table IX), racial/ethnic data are reported by county. Of the total number of students enrolled Statewide, 74.1 percent were White; 17.6 were Black; 7.1 percent were Hispanic; 0.1 percent were American Indian or Alaskan Native; and 1.1 percent were Asian or Pacific Islander.

School districts that reported 50 percent or more minority students were located in thirteen counties.

DROPOUTS

Table X is the first of three tables reporting dropouts from both the public elementary and secondary schools. The data contained in the table reports dropout "reasons" that are in conformity with Handbook V, Student and Pupil Accounting of the National Center for Education Statistics. Seventeen detailed explanations concerning "reasons" for discontinuing school have been consolidated into seven (7) "reasons" for reporting purposes. (See the report form in the appendix for the detail of the 17 reasons).

During the period September 1977 to August 1978 there were 22,118 dropouts reported by the public elementary and secondary schools. This was 278 more than the number reported last year. The data element titled, "New Residence: School Status Unknown", accounted for 2,681 students who had moved from the district and, their educational status (entry into another school) could not be determined. The number of students whose status remained in doubt, after moving from the district, increased from 1,653 in 1977-78 to 2,681 in 1978-79. The increase of 1,028 was attributable to all but four counties: Atlantic, Gloucester, Monmouth and Warren.

Three major areas (consolidated reasons) describe the reasons why students discontinue school: (1) behavorial or curricular, (2) economic or home influences, and (3) a category titled "other known or unknown" reasons. The detailed explanations incorporated into the behavorial or curricular category, (Col. 3) are items D5 to D10 on the survey instrument, (see appendix).

Economic or other home influences, (Col. 4) represents a consolidation of items D11 to D14. Column (5) "familial" is a combination of two items, married or pregnant. Column (7), other known or unknown reasons is a total of items D18 and D19.

Of the seven major reasons for discontinuing school, behavorial or curricular reasons were reported most frequently (8772) followed by economic or home influences, (6,772), and, other known or unknown reasons was third with 5,346. Physical illness, (284) and religious convictions (3) did not compute to a reportable percentage. Column 4, ecomomic and home influences, includes 5,915 students who were reported as employed.

Table XI carries two basic dropout categories: dropouts by grade and by sex. Ninety-three percent of the dropouts were from the high school grades nine to 12. Three grades accounted for the majority of dropouts: grades 11, 10 and 12 respectively. Of the 22,118 dropouts, 4,866 were twelfth graders.

Male dropouts continued to out-number female dropouts, and, the percent of dropouts for each sex remained relatively the same as last year. Gloucester County could not determine the status of eight (8) dropouts who had moved. Essex County could not determine the status of 361 dropouts who had moved.

Table XII is a report of the State's public school dropouts by racial/ethnic origin. Compared to 1976-77 the White student dropout population increased to 64.3 percent of all dropouts; the Black student population decreased from approximately 27 percent to 25.4 percent of all dropouts, and the Hispanic dropout population remained at 10 percent of all dropouts. Statewide, the American Indian or Alaskan Native dropouts were one-tenth of one percent. The Asian or Pacific Islander group computed to two-tenths of one percent.

The latter two groups (American Indian/Alaskan Native and Asian/Pacific Islander) accounted for 61 dropouts statewide. The White, Black and Hispanic dropouts were 99.7 percent of all dropouts appearing in Table XII.

The counties with the larger enrollments also reported the majority of dropouts. Counties with 1,000 or more dropouts were: Essex, Passaic, Hudson, Monmouth, Middlesex, Bergen, Camden, Ocean, Union, Mercer, Burlington and Cumberland respectively. Warren County reported 286 dropouts; Sussex 258; Salem 237; and Hunterdon 180.

Table XII shows that when we classify dropouts as "Minority" we are describing primarily Black and Hispanic students. Of the 35.7 percent of "Minority" dropouts, 35.4 percent were Black and Hispanic students. Minority dropouts declined from 37.2 percent of all dropouts in 1976-77 to 35.7 percent in 1977-78.

Table XIII pupils suspended and expelled, appears for the first time in the Vital Educational Statistics series. Column 7 shows the total number of students suspended (84,918) from school between September 1977 to August 1978. Column (10) shows the number of students expelled (86) from school between September 1977 to August 1978.

One third of the counties reported slightly in excess of one half of the pupils suspended from school. Ranked from high to low those counties were: Middlesex, Monmouth, Union, Essex, Camden, Bergen and Passaic. When counties are ranked in terms of their suspension rates a different picture emerges. Ranking the counties in terms of suspension rates, places Cumberland and Salem first with rates of 12.2 and 12 percent respectively. At the other end of the array, Essex and Bergen Counties reported suspensions at 4.1 percent of the students on roll. Statewide, the average 1977-78 suspension rate was 6.3 percent of the students on roll.

Of the 84,918 pupils suspended (each pupil was counted once) 58,297 (68.7 percent) were White and 26,621 (31.3 percent) were minority students. Male students were suspended more frequently than female students. Of all pupils suspended 69.6 percent were male and 30.4 percent were female.

Instructions to respondents asked for student suspensions "from school" and not a report of detentions or reassignments within school for minor disciplinary reasons.

GRADUATES

The five tables in the "follow-up of graduates" series was developed from follow-up studies conducted by the public secondary schools during the fall of 1978. Table XIV is a basic table with data on those graduates who continued their education and those who were employed, or, engaged in some other endeavor. Table XV expands the "continuing education", "not continuing education" dichotomy to reflect gender. Table XVI is a composite of all graduates by sex and the location of graduates within or outside the State. The last two tables, (17 and 18) contain the racial/ethnic composition of graduates and the racial/ethnic composition of those who continued education at a college or university.

Table XIV shows that 97,079 students graduated from New Jersey public high schools in 1978. That number was 316 less than reported in 1977. Approximately 61 percent of the graduates continued their education and 39 percent did not continue with their education.

The percentages appear to be consistent with the data reported for the last four years. Present projections indicate that the number of public high school graduates will have peaked at the close of the present decade. In the beginning of the 1980's, and for several years into the decade, graduates are projected at the 95,000 level. In the middle of the decade a gradual decline is expected.

Approximately 73 percent of the graduates not continuing their education reported they were employed.

Table XV shows that Statewide, female graduates continue their education in numbers greater than males, and, male graduates not continuing their education exceed the females. Seven (7) counties exceeded the Statewide percent of graduates continuing with some form of education. The remaining counties (14) exceeded the Statewide percent of graduates not continuing education.

Table XVI is a report of the location of public high school graduates at the time the follow-up surveys were conducted by the individual high schools. Of the total of 97,079 graduates, 70,987 (73 percent) were located in New Jersey. Approximately 27 percent of the graduates were located out-of-state.

Statewide, female graduates exceeded male graduates by 1,493. County by county, the ratio of male and female graduates to the total of all graduates, was very similar to the statewide average of 49.2 percent male and 50.8 percent female.

Table XVII is a racial/ethnic distribution of New Jersey's public high school graduates. Of the 97,079 graduates 16.4 percent were classified as minority. That percentage was one percent greater than reported in 1977. Nine counties exceeded the statewide average of 16.4 percent of minority graduates. They were Hudson, 45.9 percent (an increase of 8.4 percent over 1977) Essex 38.5 percent, Atlantic 27.9 percent, Cumberland 26.5 percent, Mercer 22.5 percent, Salem 21.3 percent, Union 21.0 percent, Passaic 20.9 percent, and Burlington 17.4 percent.

Twelve percent (12.1) of the graduates were Black, 3.7 percent were Hispanic and the remaining minority groups accounted for approximately one half of one percent of all graduates.

Table XVIII is the racial/ethnic distribution of public high school graduates who had continued their education at at college or university. Of the 50,431 graduates continuing their education at a college or university, 5,047 (10 percent) were Black, 1,534 (3.0 percent) were Hispanic, 425 (0.8 percent) were Asian or Pacific Islander and 16 were American Indian or Alaskan Native.

Of the 50,431 graduates at a college or university 29,466 were matriculating in New Jersey (an increase of 388 over 1977). Graduates attending out-of-state colleges were 41.6 percent of the total or 20,965 in number.

Comparison of Selected High School Graduate Data

Data Element	1977-78	1978-79
Total High School Graduates	97,395	97,079
Continuing Education	58,971	58,845
Not Continuing Education	38,424	38,234
Graduates Located In-State	71,020	70,987
Graduates Located Out-of-State	26,375	26,092
Racial/Ethnic Composition:

NEW JERSEY DEPARTMENT OF EDUCATION/OMI

SECTION III

FACILITIES INFORMATION

SCHOOL FACILITIES

This section contains four (4) tables related to school facilities but particularly instructional rooms. The first two tables show the net change (over last year) in available instructional rooms, and the instructional rooms available in the public elementary and secondary schools. The third table shows instructional room availability and need. The fourth table addresses the cost of meeting the capital improvement needs of the public schools, and, a projection showing the years in which bids will be received.

Table XIX: at the beginning of the fiscal or school year (1978-79)*, there were 69,693 instructional rooms available to public school students. That number represented an increase of 674 rooms or a net increase of approximately one percent. All but three (3) of the counties reported an increase in the number of available instructional rooms. Percentage-wise the greatest gains (over last year) were made by Cumberland, Warren, Mercer and Camden respectively,

Table XX (when compared with last year) will show that of the gain of 674 instructional rooms available at the close of the 1978 school year, 423 were elementary and 251 were secondary. The total number of elementary instructional rooms was 45,686 and the total of secondary instructional rooms was 24,007. Approximately 65.5 percent of all instructional rooms was devoted to elementary education and 34.4 percent to secondary education.

Table XXI separates available instructional rooms into two categories: rooms available and rooms needed. The available rooms are further separated into rooms in-use and rooms not-in-use.

NOTE: May also read: "end of school year 1977-78"

The rooms "needed" section reports on the numbers needed to meet excess enrollments and the number needed to replace sub-standard instructional rooms.

Of the instructional rooms available (69,693) 596 were reported "not-in-use". This is an increase of 103 over last year, however, of all of the available rooms, the number not-in-use, was reported to be only nine tenths of one percent. Columns 5, 6 and 7 of Table XXI show the additional instructional rooms needed for excess enrollments and those needed to replace sub-standard rooms. The total number of rooms needed (2,651) represents a six percent (6%) improvement over last year when 2,830 rooms were reported as needed. The greatest gains (in available rooms) were those reported to meet excess enrollments. Only a two percent gain (over last year) was reported in the replacement of sub-standard facilities.

All of the counties reported a need for additional instructional rooms. In order to alleviate excess enrollments conditions five (5) counties reported needs in excess of 100 or more rooms: Ocean, Essex, Gloucester, Atlantic, and Monmouth.

Additional instructional rooms needed for replacement of sub-standard rooms was reported by all counties. Ten counties reported needing 50 or more replacement rooms.

Table XXII reflects the dollar value of the estimated cost of all capital improvement projects for which bids will be received between the years 1978-79 and 1981-82. The table shows that Statewide, 1,084 projects with a dollar value of $408,062,000 will be actively soliciting bids within the four year period (1978-79 to 1981-82).

The estimated cost of all capital improvement projects (Column 3) increased by $26,692,000 between 1977 and 1978.

All of the counties reported capital improvement projects. Fourteen counties reported estimated capital improvements in excess of $10,000,000 each.

There were forty-seven (47) schools reported on split or curtailed sessions. Of that number 24 were elementary schools and 23 were secondary schools. Ocean County reported eleven (11), Monmouth County six (6) and Gloucester County five (5). The remainder were reported in twelve other counties.

Comparison of Selected School Facilities Data

Data Element	1977-78	1978-79
Total Instructional Rooms Available	69,019	69,693
Elementary Instructional Rooms	45,263	45,686
Secondary Instructional Rooms	23,756	24,007
Instructional Rooms:		
In Use	68,526	69,097
Not In Use	493	596
Estimated Cost of all Capital Improvement Projects (in thousand of dollars)	$381,370	$408,062

VITAL EDUCATIONAL STATISTICS
SEPTEMBER 29, 1978
VOLUME II

Note:

This is a report of public school data collected through the State Department of Education's Annual Fall Survey and is published in accordance with the requirements of N.J.S.A. 18A:4-40 and Chapter 212 Laws of 1975. The report is divided into sections that will emulate the basic staff personnel sub-systems through which the Department plans to collect, process and retrieve all future data. It is designed to provide the hundreds of users who request information from the Office of Management Information with a data source that may meet their needs.

INTRODUCTION

The 1978-79 edition of Vital Educational Statistics has been divided into two volumes. Volume II is devoted entirely to staff personnel data collected from the local school districts. Volume I contains school district, school, student and facilities data.

This publication, (Volume II) contains both certificated and non-certificated staff personnel data. The certificated staff data (Section I) deals with staff employed on a full-time basis; academic degrees held; certificates held; staff mobility; racial/ethnic composition and sex. The non-certificated data (Section II) are essentially the following: numbers of staff employed by professional and non-professional classifications; the number employed in the various support service program areas, and, the racial/ethnic distribution of full-time personnel.

Certificated staff personnel are those personnel who are required to hold certificates issued by the State Board of Examiners. Non-certificated staff are those support service personnel who are not required to hold State certification from the State Board of Examiners (educational).

The development of a separate publication devoted to staff personnel matters comes in response to the many requests for data received by the Office of Management Information. With the mounting importance of staff accounting and the rapid improvements being made in school personnel management systems, the availability and utilization of staff imformation will need to be improved from time to time. Hopefully, those improvements will be reflected in future editions of this publication as a response to the changing needs of the 1980's.

The Office of Management Information wants to acknowledge the efforts of the District Data Analysts and the personnel officers who supplied the staff data reported in this publication.

We also want to acknowledge the efforts of the County Data Analysts listed on the following page. Their efforts in organizing workshops and coordinating the distribution, collection and edit of the Survey instruments is largely responsible for the credibility of the information contained in this publication. The Office of Management Information staff who were responsible for editing the instruments, the computer printouts and the tables contained in this publication, were supervised by Terri Bolla and Elaine Ailey.

Alex Aderer was responsible for the development and machine edit of the many computer runs required to produce the school, district, county and State level reports generated in support of the publication.

SECTION I

CERTIFICATED STAFF INFORMATION

CERTIFICATED STAFF INFORMATION

The 11 tables in this section contain data on the certificated staff employed in the public schools of New Jersey on September 29, 1978. The tables are organized to reflect staff employed systemwide by the major position categories: administrators/supervisors; classroom teachers and special educational services personnel. Racial/ethnic data are also provided for the major position categories.

Table I is the basic table in this series. The full-time certificated staff employed appear in three categories: administrators/supervisors; classroom teachers, and, special educational services personnel. On September 29, 1978 there were 97,522 full-time certificated staff employed in the State. That total was 482 greater than the number reported last year. Increases were in the following categories: administrators/supervisors 137 and 613 special educational services personnel. The number of classroom teachers decreased by 268. The majority of increases in the administrator/supervisor category were due to a certification change that required "department heads" to be classified as subject supervisors.

Increases in the support services personnel area were largely a result of the various State administered Federal Programs authorized by the Elementary and Secondary Education Act of 1965.

Table II shows those certificated staff members who are assigned to either the elementary or secondary level and those who serve in systemwide positions. The latter may include administrators, classroom teachers or special educational support services personnel. In some instances the personnel serving systemwide are identified as "itinerants" or personnel "unclassified" in terms of specific school or educational level.

There were 9,490 persons serving systemwide in 1978-79. That was an increase of 405 over 1977-78.

Table III takes a look at the certificated staff personnel assigned exclusively to elementary schools. The data show that of the 51,059 certificated staff serving the elementary schools 44,369 (86.9 percent) are classroom teachers, 4,366 (8.6 percent) are educational support services personnel, and 2,324 (4.5 percent) are administrators or supervisors.

Compared to last year there was an increase of 205 educational support services personnel serving elementary schools. There was an increase of seven (7) administrators or supervisors and a decrease of 559 classroom teachers.

Table IV reflects full-time certificated staff personnel assigned exclusively to the secondary schools. The data show that of the 36,973 certificated staff serving secondary schools, 30,621 (82.8 percent) are classroom teachers, 3,769 (10.2 percent) are educational support services personnel, and, 2,583 (7.0 percent) are administrators or supervisors.

Compared to last year there was an increase of 204 educational support services personnel serving secondary schools, an increase of 97 administrators or supervisors, and, an increase of 123 classroom teachers.

Table V is the first of three (3) tables dealing with the degree and certificate status of the three major certificated staff categories used in this publication. Each of the three categories: administrators/supervisors, classroom teachers and educational support personnel are also reported by sex.

Approximately 81.8 percent of all administrators and supervisors are male and 18.2 percent are female. Of the 137 increase in administrators and supervisors, over last year, 88 were female and 49 were male.

Approximately 84.6 percent of the administrators or supervisors held the master's degree and 7.7 percent were holders of a doctor's degree. Master's degree holders were up again over last year whereas the holders of the bachelor's degree dropped from 477 to 439, a drop of approximately eight (8) percent.

"Regular" certificates were held by 99 percent of the administrators and supervisors in their first or major assignment (up from 98.9 percent last year).

In terms of numbers and percentages, the degree and certificate status of administrators and supervisors improved over last year.

Table VI repeats the same data elements as the previous table, however, the data are for classroom teachers. This year again, an improvement is reported in the degree and certificate status of classroom teachers. Of the classroom teachers, 23,670 (30.1 percent) held the master's degree and 275 (0.4 percent) held the doctor's degree. Both of those categories were up compared to last year. Compared to last year there was a decline in the number of classroom teachers without a degree. Teachers without degrees are primarily those serving in areas where experience, in lieu of formal education, is one of the qualifying prerequisites to employment.

The number of classroom teachers reported as having no certificate in the first or major assignment decreased from 374 in 1977-78 to 313 in 1978-79.

Approximately 63.7 percent of the classroom teachers are female and 36.3 percent are male. Compared to last year there was a decrease of 240 male classroom teachers and a decrease of 28 female teachers.

Table VII is the last of the series reporting on the degree and certificate status of certificated personnel. This table reports on the educational support services personnel, a category that has been on the increase over the past decade. The increase of 613 over last year brought the total number to 11,991 as of September 29, 1978.

The special educational support services group described in this table includes such titles as librarian, nurse, psychologist, counselor, remedial instructor, etc. Females constitute 74.4 percent of the educational support services group. Males account for 25.6 percent of the total support services group.

Table VIII is the first of three tables reporting on the racial/ethnic composition of certificated staff. Of the administrators and supervisors serving full time, 6,347 (91.2 percent) were White, 570 (8.2 percent) were Black and 41 (0.6 percent) were Hispanic. Compared to last year there were increases in each of the major racial/ethnic categories as well as a percentage increase in the "minority" group.

Table IX reports on the racial/ethnic distribution of classroom teachers. Of the 78,569 classroom teachers employed full-time, 70,440 (89.7 percent) were White, 6,923 (8.8 percent) were Black, 982 (1.2 percent) were Hispanic, 198 (0.3 percent) were Asian or Pacific Islander and 26 were American Indian or Alaskan Native. Compared to last year there was an increase in the group classified as "minority".

Table X is the last of three tables reporting on the racial/ethnic characteristics of certificated staff. In this table, the educational support services group is reported by racial/ethnic categories: 10,740

(89.6 percent) were White, 1,071 (8.9 percent) Black, 140 (1.2 percent) were Hispanic and there were 40 full-time personnel in the two remaining categories. The minority group is 10.4 percent of the total. That represents an increase over the percentage reported last year.

Table XI summarizes the mobility characteristics of full-time certificated staff including the three major categories: administrators and supervisors, classroom teachers, and special educational support services personnel. Statewide the data again show more certificated staff "leaving" than "entering". Of the three major categories, only the educational support services group shows a larger number entering than those leaving.

The terms "entering" and "leaving" are a composite of approximately 21 coded explanations (reasons) supplied to respondents to facilitate identification of sources of staff supply, and, the destination of those who either transfer from school to school, resign, retire, or accept employment in non-teaching positions etc.

Statewide, the mobility rates for 1978-79 were the highest in the last three years. As in the past three years the mobility rates were highest for the educational support services group, followed by classroom teachers and administrators/supervisors respectively. The mobility rate for total certificated staff leavers exceeded the 1977-78 rate by approximately 0.6 percent, and, the entering rate for total certificated staff exceeded the 1977-78 rate by one and four tenths percent.

Comparison of Selected Certificated Staff Data

Item	1977-78	1978-79
Total Certificated Staff	97,040	97,522
Administrators/ Supervisors	6,825	6,962
Classroom Teachers	78,837	78,569
Special Educational Support Services	11,378	11,991
Minority Administrators/ Supervisors	592	615
Minority Classroom Teachers	7,927	8,129
Minority Special Educ. Support Services	1,159	1,251
Entering	12,833	14,229
Leaving	13,855	14,565

*DURING THE PERIOD OCTOBER 1, 1977 AND SEPTEMBER 30, 1978

SECTION II

NON-CERTIFICATED STAFF INFORMATION

NON-CERTIFICATED STAFF

This section contains three (3) tables reporting data on non-certificated staff personnel. The tables report data by support service program areas, the number of professional and non-professional personnel, the racial/ethnic distribution of full-time (non-certificated) staff, and the full-time equivalent (FTE) of all non-certificated support services personnel.

Table XII shows that of the 43,100 full-time non-certificated support services personnel the majority (42,003) were reported in the non-professional category. There were 1,097 professionals in the non-certificated support services group.

Of the eight (8) support services program areas, business services accounted for 24,812 (58 percent) of the non-certificated support personnel. School administration and instructional services combined, accounted for 26 percent of all non-certificated support personnel.

Table XIII is a racial/ethnic distribution of full-time non-certificated support services personnel. Of the group classified as "minority" 6,866 (15.9 percent) were Black, 991 (2.2 percent) were Hispanic and there were 75 personnel in the two remaining categories. Of the total number of full-time non-certificated support staff, 18.4 percent were "minority".

Of the total number of full-time non-certificated support staff, 27,129 (62.9 percent) were female and 15,971 (37 percent) were male.

Table XIV is a composite of the full-time equivalent of all non-certificated support services personnel. Column ten (10) shows that of the 51,643.1 full-time equivalent staff 57.5 percent were assigned to business services, 14.5 to instructional services and 10.6 to school administration. The remainder were reported in general administration, pupil services, community services and "other". The full-time equivalent of part-time non-certificated staff at the time of the report was 8,543.1.

Comparison of Selected Non-Certificated Staff Data

Item	1977-78	1978-79
Total Non-Certificated Staff	42,416	43,100
Racial/Ethnic Distribution:		
White	34,654	35,168
Black	6,749	6,866
Hispanic	945	991
American Indian/ Alaskan Native and Asian or Pacific Islander	68	75
